

DIN 5-Pin to 4 RCA Audio Video Cable

This audio video cable features a 5-pin DIN connector on one end and four RCA connectors on the other. It connects older audio and video equipment, providing a solution for various AV applications.

Product Overview

Professional AV Connectivity

This DIN 5-Pin to 4 RCA cable is engineered for reliable audio and video signal transmission. It features a versatile 5-pin DIN connector on one end and a quad-RCA configuration on the other, making it an essential solution for connecting legacy equipment like VCRs, DVD players, and older gaming consoles to modern display or audio systems. Designed for durability and clarity, this cable supports seamless integration in various AV and surveillance applications.
