

DIN Flange Globe Valve PN16, WCB Body

This globe valve is constructed with a WCB body and designed with a DIN standard flange connection. It is suitable for use in oil fields, chemical industries, coal mines, and environmental protection applications.

Product Overview

Industrial DIN Globe Valve

This DIN standard flange globe valve is engineered for precise flow control and reliable shutoff service in demanding industrial environments. Constructed with a robust WCB cast steel body and rated for PN16 pressure, it ensures durability and consistent performance. Its design facilitates effective throttling, making it a versatile solution for a wide range of fluid handling applications.

Technical Specifications

Pressure Rating	PN16 (1.6 MPa)
Body Material	WCB (Cast Steel)
Connection Type	DIN Flange
Nominal Size (DN)	40 DN
Identification Codes	A1177, DS
