

DIN Lifting Check Valve DN 15-200

This DIN lifting check valve is designed to prevent backflow in piping systems. It features a robust construction for reliable performance in demanding industrial applications.

Product Overview

DIN Lifting Check Valve

This DIN lifting check valve is engineered to prevent backflow in piping systems, ensuring reliable performance in demanding industrial environments. Featuring a robust construction, it provides a positive shut-off mechanism that minimizes leakage risks and maintains overall system integrity. Designed for versatility, this valve is suitable for a wide range of fluids and operating conditions, making it an ideal choice for general machinery and fluid handling systems.

Technical Specifications

Standard

DIN

Key Features

- Prevents backflow
- Positive shut-off mechanism
- Robust construction
- Corrosion and wear resistant

Nominal Diameter (DN)	15-200
Valve Type	Lifting Check Valve
