

DIN Rail Mount Fuse Holder

This fuse holder is designed for DIN rail mounting, providing secure protection for electrical circuits. It features screw-type termination for easy wiring and is suitable for standard ST type fuses.

Product Overview

Industrial DIN Rail Fuse Protection

This DIN rail mount fuse holder is engineered for secure and reliable circuit protection in demanding industrial environments. Featuring a robust construction, it provides a stable interface for standard ST type fuses with convenient screw-type terminations for rapid installation. Its compact design ensures efficient use of panel space while offering clear visual indication for rapid maintenance.

Technical Specifications

Mounting Style	DIN Rail
Termination	Screw-type
Compatible Fuse Type	ST Type

Features

Product Highlights	DIN Rail Mount, Screw Termination, Industrial Grade, Visual Status Indication
