

DIN Standard Manual Ball Valve with Flanged Connections

This ball valve is suitable for applications in oil fields, the chemical industry, and coal mines. It features good tightness.

Product Overview

DIN Standard Manual Ball Valve

This DIN standard manual ball valve with flanged connections is designed for reliable flow control in demanding industrial environments. Featuring a robust metal construction and a manual lever handle, it ensures secure sealing and long-lasting durability. The valve body is assembled with high-quality bolts and nuts to provide a secure, leak-proof connection suitable for various fluids and pressures.

Technical Specifications

Pressure Rating

16 PN

Pressure Class

Connection Type	Flanged
Standard	DIN
Operation Method	Manual Lever Handle
Key Features	Metal Construction, Leak-proof Design, Bolt-assembled Body
