

DIN Swing Check Valve DN 50-600

This DIN swing check valve is designed to prevent backflow in piping systems. It features a robust construction with flanged ends for secure connection.

Overview

DIN Swing Check Valve Overview

This DIN standard swing check valve is engineered for reliable backflow prevention in industrial piping systems. Designed to meet DIN specifications, it features a robust construction suitable for demanding applications. The unit incorporates flanged ends to ensure a secure, leak-resistant connection in diverse fluid handling environments.

Technical Specifications

Key Features

- Flanged end connections
- Backflow prevention
- Robust industrial construction

Nominal Diameter (DN)	50-600
Standard	DIN, DIN 3202
Valve Type	Swing Check Valve
