Product Overview

DIN3352 F4 Cast Iron Gate Valve

This DIN3352 F4 compliant gate valve is engineered for reliable shut-off and fluid flow control in various industrial applications. Constructed with a robust cast iron body and bonnet, it offers excellent durability and corrosion resistance. It is suitable for handling a wide range of media, including water, oil, and gas, making it a versatile choice for professional fluid management systems.

Technical Specifications

Pressure Rating

PN 10 • PN 16

Standard Compliance

DIN3352, F4

Body Material

GG25 Cast Iron

Nominal Diameter

80 DN

Operational Details

Suitable Media

- Water
- Oil
- Gas

Operation

Manual Handwheel

Connection

Flanged
