

DIN351/UNC Hand Tap Set

These DIN351/UNC hand taps are available in sets of three with varying diameters. Constructed from high-speed steel (HSS), they are suitable for machining steel, cast iron, and other soft metals.

Product Overview

Professional DIN351/UNC Hand Tap Set

This DIN351/UNC hand tap set consists of three taps with unequal diameters, precision-ground for high-performance threading. Manufactured from high-speed steel (HSS), these tools are engineered for reliable machining of steel, cast iron, and various soft metals. The set offers versatile surface treatment options including white, titanium nitride, and titanium aluminum nitride plating to suit different industrial requirements.

Technical Specifications

Manufacturing Process	Ground
Material	High-Speed Steel (HSS)
Surface Treatments	White, Titanium Nitride-Plated, Titanium Aluminum Nitride-Plated
Compatible Materials	Steel, Cast Iron, Soft Metals
