

DIN7982 Flat Head Self-Tapping Screw

This is a DIN7982 compliant flat head self-tapping screw. It features a sharp point for easy penetration and a flat head for a flush finish.

Product Overview

DIN7982 Flat Head Self-Tapping Screw

This DIN7982 compliant flat head self-tapping screw is engineered for secure and reliable fastening across a wide range of industrial and commercial applications. The design features a sharp, precision-engineered point for effortless penetration into materials, ensuring a strong connection with minimal effort. Its flat head profile allows for a clean, flush finish, making it the ideal choice for projects where aesthetics and surface smoothness are critical.
