

Dipped Work Gloves

These gloves are designed with a dipping coating on the palm and fingers for enhanced grip and abrasion resistance. Their breathable knit backing and elastic cuffs ensure comfortable, secure protection during various tasks.

Product Overview

Dipped Work Gloves

These dipped work gloves are engineered to provide superior grip and protection across a variety of demanding work environments. Featuring a durable coating on the palm and fingers, they offer enhanced abrasion resistance for handling tools and materials safely. The design incorporates a breathable knit backing for comfort during extended wear and an elastic cuff to ensure a secure fit while keeping debris out.
