

# Direct-Drive 50L Air Compressor

This direct-drive air compressor has a 50L tank and a 2.2kW motor. It delivers compressed air at a pressure of 8 bar with a flow rate of 200L/min.

## Overview

### High-Efficiency Direct-Drive Air Compressor

The BM-50 direct-drive air compressor is engineered for high-performance applications requiring reliable compressed air. Featuring a 50L tank and a powerful 2.2KW motor, this unit is designed for rapid air buildup and energy efficiency. Its compact, lightweight construction and integrated wheels make it an ideal choice for professional environments where mobility and consistent performance are essential.

## Performance Metrics

### Rated Power

<b>2.2 KW</b> Power Output	<b>3 HP</b> Horsepower
-------------------------------	---------------------------

Rotational Speed: 2880 R.P.M

Air Delivery Capacity: 200 L/min

## Pressure Specifications

Maximum Pressure (Bar): 8 Bar

Maximum Pressure (PSI): 115 PSI

## Physical Attributes

Tank Capacity: 50 L

Dimensions (L x W x H): 68cm x 42cm x 70cm

Piston Configuration: 47mm x 1

## Certifications

Compliance Standards: CE, ISO 9001:2008
