

Direct Drive Air Compressor

This direct drive air compressor is designed for a variety of inflation and power tool applications. Featuring a robust 5HP motor and a durable tank, it delivers reliable performance and consistent air pressure.

Product Overview

Professional Performance

This direct drive air compressor is engineered for versatility, serving as a reliable solution for inflation tasks and powering pneumatic tools. Built with a robust 5HP motor and a durable tank, it ensures consistent air pressure for demanding work environments. Designed with mobility in mind, the unit features a portable frame and sturdy wheels, making it an essential asset for both professional workshops and active job sites.

Technical Specifications

Motor Power

5 HP
Motor Power

Safety Features

Pressure Relief Valve, Thermal Overload Protection

Design & Utility

Mobility Features

- Portable design
- Sturdy wheels for transport

Best For

Inflation • Power Tools • Professional Use • DIY Projects
