

# Direct Drive High-Pressure Pump with Brass Manifold

This high-pressure pump is designed for direct motor drive applications and features a robust brass manifold. The pump is engineered for efficient and reliable performance in pressure washers and other high-pressure cleaning equipment.

## Product Overview

### High-Performance Direct Drive Pump

This direct drive high-pressure pump is engineered for demanding industrial cleaning applications, featuring a robust brass manifold and durable construction. Designed for reliability, it incorporates high-quality materials to ensure extended service life and consistent performance under pressure. It is an ideal solution for pressure washers and heavy-duty water delivery systems requiring precise flow and pressure control.

## Technical Specifications

### Performance Matrix

Model	Pressure (bar)	Flow (L/min)	Power (kW)	RPM
3WZ-1808C	180	17.1	5.5	2900
3WZ-1810C	206	22.1	7.5	2900
3WZ-1810C	248	11	5.5	1450
3WZ-1812C	206	13.2	5.5	1450
3WZ-18145C	248	16	7.5	1450

### Bore and Stroke

- 18
- 8
- 10
- 12
- 14.5

## Physical Dimensions
