

Direct Drive Straight Lockstitch Sewing Machine with Thread Trimmer

This single needle direct drive straight lockstitch sewing machine is designed for efficient and precise sewing operations. It features a direct drive motor for enhanced control and an automatic thread trimmer to save time and improve productivity.

Product Overview

High-Efficiency Lockstitcher

The C-T200 is a high-performance single needle direct drive straight lockstitch sewing machine designed for professional textile manufacturing. Featuring a robust direct drive motor, it provides superior sewing control, reduced operational noise, and increased energy efficiency. The integrated automatic thread trimmer streamlines production cycles by eliminating manual trimming, significantly enhancing overall productivity in apparel assembly lines.
