

# Direct Light LED Panel

This LED panel light is designed for direct lighting applications. It features a slim profile and provides uniform illumination, making it ideal for commercial and residential spaces.

## Product Overview

### Professional Grade Direct-Lit LED Panel

This high-performance LED panel features a slim, modern design with an advanced SMD2835 light source for superior brightness and efficiency. Engineered for uniform, anti-yellowing light distribution, it provides a flicker-free, glare-free environment ideal for professional, commercial, and residential spaces. Its energy-saving technology reduces power consumption by up to 80% while ensuring a long, low-carbon operational life.

## Technical Specifications

Light Source	SMD2835
Energy Saving Potential	80 %

## Features & Benefits

### Key Advantages

- Anti-yellowing light guide plate
- Ultra-thin profile
- No flicker or noise
- Easy installation and operation
- Low pressure drive

## Applications

Suitable Locations	Offices, Exhibition Halls, Retail Shops, Jewelry Stores, Schools, Museums, Hotels, Residential
