

# Directional Communication Antenna

This directional antenna is designed for optimal signal reception and transmission. It provides enhanced directional capabilities, minimizing interference and maximizing signal strength.

## Overview

### High-Performance Signal Reception

This directional communication antenna is engineered for optimal signal reception, supporting both analog and digital TV signals as well as DAB/FM radio. Designed with a built-in high-gain, low-noise amplifier, it ensures clear connectivity and minimal interference. Its durable, waterproof, and anti-UV construction makes it a reliable solution for various environments, including mobile applications like boating and camping.

## Technical Specifications

### Amplifier Features

High Gain • Low Noise

Model Number	WS-101
Signal Compatibility	Analog TV, Digital TV, HDTV, DAB, FM Radio

## Power & Durability

### Power Input

- AC Input
- DC Input

Durability Features	Anti-UV Coating, Waterproof, Shielded
---------------------	---------------------------------------

## Usage & Portability

### Recommended Use Cases

- Mobile Use
- Camping
- Boating
- Indoor
- Outdoor
