

# Directional Electric Space Heater

This electric dish heater offers focused and efficient heating. It utilizes a reflective dish to maximize heat radiation in a specific direction.

## Product Overview

### Efficient Directional Heating

This directional electric space heater is designed to provide targeted warmth for small to medium-sized spaces. Featuring a reflective dish design and a circular heating element, it effectively focuses heat where it is needed most. With adjustable settings and essential safety features like overheat protection and a tip-over switch, it is a reliable solution for personal comfort.

## Performance

### Heat Settings

**400 W**

Low Heat

**800 W**

High Heat

### Oscillation

Yes

### Timer

1 hour

## Safety Features

### Safety Mechanisms

Overheat Protection, Tip-over Switch

## Design

### Construction

- Reflective dish design for focused heat
- Protective metal grill
- Durable black plastic housing
- Stable round base
