

Directional TV Antenna for VHF/UHF

This high-gain directional antenna is designed for receiving over-the-air television signals. Its multi-element Yagi-Uda design is optimized for maximum signal reception, and it includes a mounting bracket for easy installation.

Product Overview

High-Performance Directional Reception

This high-gain directional antenna is expertly engineered for reliable over-the-air television signal capture. Utilizing a multi-element Yagi-Uda design, it is optimized to provide clear reception in both urban and rural environments where signal strength may be limited. Its durable, weather-resistant construction ensures longevity, while the included mounting bracket facilitates straightforward installation on masts or poles.

Technical Specifications

Reception Characteristics

- High-gain directional
- Minimized signal interference
- Optimized for long-distance reception

Supported Bands	VHF, UHF
Antenna Design	Multi-element Yagi-Uda

Installation and Durability

Mounting Hardware

Mast Mount Included • Pole Mount Included

Weather Resistance	Yes
