

Direct/Reflecting Speaker System

This speaker system combines direct and reflected sound to deliver a unique listening experience. It features multiple drivers strategically positioned to radiate sound both directly and reflected off the walls, creating a wider, more immersive soundstage.

Overview

Direct/Reflecting Speaker Technology

This speaker system utilizes a unique Direct/Reflecting design to recreate the spacious, natural sound of a live concert hall. By utilizing nine full-range drivers per cabinet, the system directs 11% of sound forward and reflects 89% off the walls of your room. This innovative approach expands the soundstage, creating an immersive listening experience that makes performers feel present in your space.
