Overview

High-Performance Dirt Bike Wheel Assembly

These dirt bike wheels are engineered for motocross enthusiasts seeking the ultimate balance of strength and weight reduction. Each unit is fully assembled with high-tensile stainless steel spokes and 7050 Series aluminum rims, ensuring long-lasting durability in demanding off-road conditions. The wheels arrive complete with bearings and spacers, providing a ready-to-fit solution for immediate installation.

Technical Specifications

Rim Material	7050 Series Aluminum Alloy
Spoke Material	High-tensile Stainless Steel
Nipple Material	Anodized Aluminum
Product Advantages	Corrosion Resistant, High Tensile Strength, Lightweight Design, Impact Resistant, Ready-to-Fit

Features

Included Components

- Bearings
- Spacers
- Stainless steel spokes
- Aluminum nipples
