

# Disc Brake Assembly with Rotor and Caliper

High-performance disc brake assembly designed for reliable and efficient braking. It features a durable rotor and caliper, ensuring optimal stopping power and heat dissipation.

## Product Overview

### High-Performance Braking Solution

This premium disc brake assembly is engineered to provide superior stopping power and thermal management. Designed for durability, the set includes a precision-machined rotor and a heavy-duty caliper. It is optimized for consistent performance across various automotive applications, ensuring safety and efficiency for your vehicle fleet.

## Technical Specifications

### Components Included

- Disc Brake Rotor
- Brake Caliper

### Key Features

High-Performance, Heat Dissipation, Durable Construction

### Target Use

Automotive applications
