

Disc Brake Pads

These high-performance disc brake pads are manufactured with new materials and advanced technology. The brake pads provide a cleaner, quieter, and more durable braking solution.

Product Overview

High-Performance Disc Brake Pads

These advanced disc brake pads are engineered using imported materials and American technology to deliver superior braking performance. Designed as a non-polluting and asbestos-free solution, they offer a quieter, cleaner, and more durable alternative to traditional pads. Engineered for longevity and high safety, these pads meet international advanced standards and are suitable for global export markets.

Certifications & Compliance

Certifications	ISO 9001, JIS D4411

Performance Features

Key Benefits

- Non-polluting design
- Asbestos-free material
- Low noise operation
- High wear resistance
- Extended service life
- High safety coefficient
