

Discarded Plastic Material

This is discarded plastic material, including containers, casings, and electronic components. The waste is densely packed and suggests improper disposal and potential environmental concerns.

Product Overview

Material Composition

This offering consists of a collection of discarded plastic materials and electronic waste. The inventory includes a mix of containers, casings, and various plastic components alongside miscellaneous electronic equipment such as keyboards and monitors. This material is suitable for recycling facilities or industrial processing centers looking to source mixed plastic and electronic waste streams.
