Product Overview

Compact Kitchen Hygiene Solution

This tabletop disinfection cabinet offers a portable and efficient way to sterilize and dry kitchenware. Utilizing UV light at 253.7 nm and hot air circulation, it effectively eliminates bacteria like E. coli and Staphylococcus aureus. Designed for convenience, it requires no installation and features a user-friendly single-knob timer control for various tableware types.

Key Features

Safety Mechanisms

- Safety microswitch (automatic power cutoff when lid is opened)
- Overheat protection fuse
- Abnormal temperature detection chip

Sterilization Technology

UV Sterilization (253.7 nm), Hot Air Drying

Performance & Operation

Operating Cycles

Mode	Duration
ECO	10-20 min
Standard	35-45 min
Intensive	50-60 min

Energy Consumption

0.2 kWh

Energy per cycle

Design & Build

Noise Level

Low Noise • DC Motor

Material Construction

Stainless Steel Bowl Rack, Translucent Cover

Installation Type

Portable / Countertop (No installation required)
