Product Overview

High-Efficiency Drain Pump

This drain pump is engineered for reliable performance in both dishwashers and washing machines, serving as a critical component for effective wastewater removal. Designed for durability and longevity, it ensures consistent operation by efficiently evacuating water to prevent clogs. The unit is built to resist corrosion from detergents and water exposure while minimizing operational noise, making it an ideal choice for appliance maintenance and repair.

Technical Specifications

Model Number	B12-6A01
Compatible Appliances	Dishwasher, Washing Machine

Key Features

Core Benefits

- Robust construction for extended longevity
- Corrosion-resistant materials
- Noise reduction technology
- Easy installation design

Operational Metrics

1 Wastewater Removal
Function
