Product Overview

High-Efficiency Drain Pump

This specialized drain pump is designed for high-performance water removal in residential dishwashing systems. Engineered for durability and reliability, the component ensures efficient water flow and prevents standing water within the appliance. Its compact design allows for easy integration into a variety of kitchen appliance models, supporting effective cleaning and rinsing cycles.

Technical Specifications

Model Number	ZWB15-A
Application	Dishwasher Drain and Wash System
Category	Home Appliance Component, Water Pump, Drainage System
