

Disposable Boot Covers with Integrated Sole

These disposable boot covers provide a protective barrier. Constructed from lightweight material, they feature an elastic band and integrated sole.

Product Overview

Professional Protective Footwear

These disposable boot covers are engineered for high-stakes environments where contamination control is critical. Constructed from waterproof SF/SMS material with an integrated PVC sole, they provide a reliable barrier against moisture and body fluids. Designed for single-use applications, these covers feature a secure elastic fit and enhanced traction, making them an essential solution for medical facilities and cleanrooms.
