

Disposable Face Mask for Textile Machinery

This disposable face mask is designed for use in textile machinery environments. The mask features a pleated design and is constructed from multi-layer non-woven fabric with elastic ear loops.

Product Overview

Industrial Protection for Textile Environments

This disposable face mask is specifically engineered for the textile machinery sector to provide essential protection against airborne dust and manufacturing debris. Featuring a multi-layer non-woven fabric construction, it balances high-efficiency filtration with optimal breathability. Designed for comfort and security during long shifts, the mask utilizes a pleated structure and elastic ear loops to accommodate diverse face shapes.

Technical Specifications

Fit Features

- Elastic ear loops
- Enhanced coverage
- Disposable/Single-use

Design	Pleated
Construction	Multi-layer non-woven fabric
Primary Applications	Textile Machinery, Dust Protection, Particle Filtration
