

Disposable Lighters for Cigarettes and Candles

These lighters are designed for lighting cigarettes, candles, and other flammable materials. Each lighter features a metal shield over the ignition mechanism and a plastic body.

Product Overview

Reliable Disposable Lighters

These disposable lighters are designed for convenient and reliable use in various settings, including lighting cigarettes, candles, and other flammable materials. Each unit features a durable plastic body and a protective metal shield over the ignition mechanism to ensure safety during operation. These lighters are intended for single-use applications, making them a practical choice for high-turnover environments.
