

Disposable Protective Isolation Gown

This disposable gown complies with standard GB19082-2009. It is suitable for providing protection to medical staff.

Product Overview

Professional Protection

This disposable isolation gown is engineered to provide a robust barrier against particulate matter and liquid splashes in critical environments. Compliant with the GB19082-2009 standard, it combines high-level water resistance with essential breathability to ensure safety for medical staff. Designed for versatility, it is an ideal solution for casualty wards, surgery rooms, and laboratory settings.
