Product Overview

Professional Protective Solution

This disposable protective suit is engineered for high-demand environments including hospitals, laboratories, and pharmaceutical facilities. The design focuses on ergonomics, incorporating a tailored fit that allows for a full range of motion while providing reinforced protection in high-stress areas. With a hooded, fully-sealed design and breathable construction, it ensures comfort and safety during extended professional use.

Standards and Compliance

Compliance Verification

- Technical Documentation compatible with Medical Devices Directive 93/42/EEC
- Includes test reports and complete validation documentation
- Voluntary certification verification available
- Classification: Class I (Not Sterile)

Certifications

FDA, EU GMP, ISO 9001, CE Compliant
