

Diving Knife with Serrated Edge

This diving knife features a durable stainless steel blade and serrated edge. It is equipped with an ergonomic orange handle and a black sheath with a locking mechanism.

Product Overview

Professional Diving Knife

This durable diving knife is engineered for underwater tasks that require precision cutting or prying. It features a high-quality stainless steel blade equipped with a serrated edge for effective cutting performance. The ergonomic orange handle ensures a secure, high-visibility grip, while the included sheath with a locking mechanism and rubber straps allows for reliable attachment to diving gear.
