

# DMR Repeater with IP Connectivity

This digital mobile radio (DMR) repeater is designed for professional communication networks. It supports IP connections for seamless integration into existing network infrastructure.

## ADDITIONAL IMAGES

## Overview

### Professional DMR Repeater Solution

This highly integrated DMR repeater is engineered for mission-critical communication networks, offering robust performance in demanding environments. Featuring a flexible modular design, it supports both fixed base station operations and sophisticated IP networking. With built-in self-inspection circuits and module redundancy, it ensures reliable, steady operation for public safety, transportation, and industrial applications.

## Key Features

### Core Technologies

DMR, IP Connectivity, Simulcast Mode, Module Redundancy, Self-Inspection Circuit

## Durability & Standards

### Environmental Protection

IP54 Rated • MIL-STD-810C • MIL-STD-810D • MIL-STD-810E • MIL-STD-810F

## Operational Capabilities

### System Modes

- DMR Repeater Mode
- Fixed Base Station
- IP Networking
- Simulcast Mode

### Management Features

- Remote Parameter Programming
- Dispatch Center Integration
- Monitor/Transmit Interrupt
- Scalable Network Coverage
