

# DN1100 Ductile Iron Pipes

These DN1100 ductile iron pipes are suitable for municipal water supply projects. They are designed for underground installation, offering a reliable solution for water transmission.

## Overview

### High-Performance Water Transmission Solutions

These DN1100 ductile iron pipes are engineered for large-scale municipal water supply and transmission projects. Available in lengths of 6 meters and 8.15 meters, they offer a versatile solution for complex infrastructure needs. The pipes feature advanced coatings and high-strength construction to ensure long-term durability in various soil conditions.

## Key Metrics

### Key Specifications

**1100 mm**

Nominal Diameter

**38000 km**

Annual Capacity

**8.15 m**

Max Length

## Technical Specifications

### Standard Lengths

- 6 meters
- 8.15 meters

### Diameter Range

DN80 to DN2600mm

## Quality & Compliance

### Management Standards

- Occupational health and safety management system
- Environmental management system
- Quality management system

### System Certifications

ISO 9001, ISO 14001, GB/T 28001, French BV, Korea KS

## Installation & Application

### Primary Applications

Water Conservancy • Municipal Engineering • Water Transmission • Infrastructure

## Global Reach

### Export Presence

Exported to 120 countries and regions
