

DN20 Brass Ball Valve with Lever Handle

This ball valve is designed for controlling the flow of liquids and gases. It features a durable brass body and a red lever handle for easy operation.

Product Overview

Industrial Grade Ball Valve

This DN20 ball valve is engineered for reliable flow control in industrial liquid and gas systems. Constructed with a durable brass body, it ensures long-term performance and resistance to operational stress. The integrated red lever handle allows for quick and intuitive manual operation, making it an ideal component for various plumbing and industrial process applications.

Technical Specifications

Handle Color

Red

Nominal Diameter

DN20

Body Material

Brass

Handle Type

Lever Handle

Features

Applications

Industrial, Liquid Systems, Gas Systems
