

Dock Connector to RCA Component Video and Audio Cable

This cable allows connection of devices featuring a dock connector to displays or audio systems. It utilizes component video (Y, Pb, Pr) and stereo audio (left and right) RCA connectors for high-quality video and audio output.

Overview

High-Quality AV Connectivity

This Dock Connector to RCA Component Video and Audio cable serves as an essential bridge for legacy device integration. Designed for seamless signal transmission, it allows users to connect devices featuring a dock connector to external displays or audio systems. It supports high-quality component video (Y, Pb, Pr) and stereo audio output, ensuring clear and reliable performance for professional or home AV setups.

Technical Specifications

Signal Type

Analog Video • Analog Audio

Input Connector

Dock Connector

Output Connectors

Component Video (Y, Pb, Pr), Stereo Audio (L/R RCA)

Compatibility

Compatible with devices featuring standard dock connector interfaces
