

Domestic Logistics Network Services

This service provides a logistics network across numerous provinces and cities in China. Operation departments are established in key areas and secondary cities, ensuring network coverage throughout most of the country.

Service Overview

Comprehensive Logistics Network

This domestic logistics network provides extensive coverage across China, spanning Tier 1 to Tier 4 cities. The service leverages a robust infrastructure of subsidiaries, branch offices, and operation departments to ensure seamless connectivity. With over 100,000 square meters of effective storage area, the network supports efficient warehousing and distribution from major metropolitan hubs down to local township levels.
