Product Overview

High-Efficiency Circulator Booster Pump

This in-line circulator booster pump is engineered for reliable domestic water recirculation. Featuring a design with suction and delivery connections on the same axis, it ensures seamless integration into existing plumbing systems. The unit comes fully equipped with necessary fittings and a 1.3-meter cable for convenient installation.

Technical Specifications

Insulation Class

Class F

Power Consumption	735 W
Rated Current	0.7 A
Maximum Head	12 m
Maximum Flow Rate	68 L/min
Max System Temperature	110 °C
Voltage/Frequency	230V / 50Hz

Operational Details

Safety Features

- Do not run empty
- In-line connection design
- Includes 1.3M power cable

Operating Modes	OFF, AUTO, MANUAL
Protection Rating	IP44
