

Door and Window Security Alarm

This slim alarm is designed for doors and windows. It detects an opening and triggers a loud alarm.

Overview

Compact Security for Entry Points

This slim, unobtrusive alarm is specifically engineered for doors and windows, providing an immediate security layer for residential or commercial properties. Designed for ease of use, it detects unauthorized opening and triggers a high-decibel alert to deter intruders. The compact form factor ensures it integrates seamlessly into existing decor without requiring complex installation.
