

Door Phone Intercom System with Electric Lock

This door phone intercom system features a door phone, two monitors, and an electric lock. The system uses RVVP4X0.5 and RVV2X1.0 cables for connections and operates on a DC 18V power supply.

Overview

Professional Intercom and Access Control

This comprehensive door phone intercom system provides secure access control with integrated electric lock support. Designed for reliability, the system includes two monitors and a robust door phone unit, making it ideal for multi-point communication. It utilizes standard cabling configurations to ensure straightforward installation and consistent performance in professional environments.
