

# DOT-3 Brake Fluid for Hydraulic Brake Systems

High-performance brake fluid is designed for use in hydraulic brake systems. It meets DOT-3 specifications and provides corrosion and oxidation protection.

## Product Overview

### High-Performance Hydraulic Brake Fluid

This extra heavy-duty DOT-3 brake fluid is engineered for superior performance in the hydraulic brake systems of passenger cars, trucks, and buses. It is designed to meet or exceed rigorous DOT-3 specifications, ensuring reliable braking power across a wide variety of operating conditions. Formulated with advanced inhibitors, it provides excellent protection against corrosion and oxidation, contributing to a longer service life for your braking components.

## Technical Specifications

Standard  
DOT-3

Net Weight

250 gram

System Compatibility

Disc Brakes, Drum Brakes, Hydraulic Systems

## Key Features

### Performance Benefits

- Extra heavy-duty formulation
- Excellent corrosion resistance
- Superior oxidation protection
- Reliable performance for cars, trucks, and buses
