

Dot Matrix Impact Printer

This dot matrix printer is designed for high-volume, continuous form printing. The printer features a wide carriage, multiple paper paths, and a durable print head, making it suitable for multipart forms and labels.

Product Overview

Robust Dot Matrix Performance

This dot matrix impact printer is engineered for high-volume, continuous form printing in demanding environments. It features a wide carriage design that accommodates large documents and offers multiple paper paths to support versatile media needs. Built for longevity, the durable print head ensures consistent output quality for specialized tasks like multipart forms and labels.
