

# Dot Matrix Impact Printer

This is a dot matrix printer using impact printing technology. It uses a print head that strikes an ink-soaked cloth ribbon against the paper.

## Product Overview

### Professional Impact Printing

This dot matrix impact printer utilizes traditional mechanical pin technology to produce crisp, reliable documents. Designed for high-volume continuous form paper workflows, it ensures consistent output through an ink-soaked cloth ribbon system. Ideal for industrial and logistical environments where multi-part forms and continuous printing are required.

## Technical Specifications

Printing Technology	Dot Matrix Impact
Print Mechanism	Electromagnet solenoid, Metal pin wire, Impact printing
Paper Type	Continuous form paper

## Connectivity

### Connectivity

- Parallel port
