

# Dot Matrix Impact Printer

This dot matrix printer is an impact printer using a print head with pins that strike an ink-soaked ribbon to create characters and images on paper. It is known for its ability to print multi-part forms and its durability in harsh environments.

## Product Overview

### Industrial Dot Matrix Printer

This dot matrix impact printer is designed for high-reliability document production in demanding environments. It utilizes a precision print head with pins that strike an ink-soaked ribbon, ensuring clear output on both standard and multi-part forms. The device is highly cost-effective and engineered for consistent performance when processing continuous form paper for invoices and receipts.

## Technical Specifications

### Media Support

- Continuous form paper
- Multi-part forms
- Standard document paper

Printing Method	Impact Dot Matrix
-----------------	-------------------

## Operational Features

### Common Applications

- Invoices
- Receipts
- Carbonless forms

Operational Advantages	Multi-part printing, Low cost-per-page, Durable design, Continuous form compatible
