

Dot Matrix Printer for Continuous Forms

This dot matrix printer is designed for continuous form printing and multi-part forms. It features a robust build for reliable performance in demanding environments.

Product Overview

Industrial Continuous Form Printer

This dot matrix printer is engineered for reliable, high-volume performance in demanding professional environments. It is specifically designed to handle continuous forms and multi-part documents with precision. The robust build ensures durability, while flexible paper handling and multiple connectivity options make it a versatile tool for various business administrative and logistics workflows.

Technical Specifications

Paper Handling Mechanisms

- Push tractor
- Pull tractor

Connectivity

Parallel, Serial

Performance

Application Compatibility

Continuous Forms • Multi-part Forms

Design Characteristics

Robust build designed for heavy-duty operational environments
