

# Double-Acting Hydraulic Power Pack Pump

This double-acting hydraulic power pack pump is a self-contained hydraulic power unit designed for industrial applications requiring high-pressure hydraulic power. It is suitable for operating hydraulic cylinders or tools in various industrial settings.

## ADDITIONAL IMAGES

## Overview

### High-Performance Hydraulic Power

This double-acting hydraulic power pack pump is engineered for demanding industrial environments requiring consistent, high-pressure hydraulic force. Featuring a robust, self-contained design with an integrated roll cage, it is built to power hydraulic cylinders, presses, and heavy-duty machinery. The unit utilizes a double-speed axial piston pump system, offering both efficiency and control for diverse operational needs.

## Technical Specifications

### Pressure Rating

<b>70 bar</b> Low Pressure (LP)	<b>700 bar</b> High Pressure (HP)
------------------------------------	--------------------------------------

### Oil Displacement per Stroke

<b>6 cm<sup>3</sup></b> Low Pressure (LP)	<b>1 cm<sup>3</sup></b> High Pressure (HP)
--	---

### Pump Design

Double-outlet, double-speed axial piston pump

## Model Comparison

### Model Specifications

Model	Capacity	Motor Power	Weight
PE120D	12 L	1.5 kW	29 kg
PE300D	30 L	2.2 kW	45 kg
PE500D	50 L	4 kW	60 kg

## Features

Key Features	Double-Acting, Two-Speed, Electric-Driven, Pressure Gauge Included, Emergency Stop, Cooling Fan Option
Power Supply	380/220V
