

# Double Bowl Cold Drink Dispenser

This dispenser features a surrounding stainless steel evaporator for efficient cooling. It offers rapid cooling and balanced temperature, with a quiet, energy-saving compressor operating at less than 65 decibels.

## ADDITIONAL IMAGES

## Product Overview

### Professional Beverage Dispensing Solution

This double-bowl cold drink dispenser is engineered for high-performance commercial use in restaurants, cafes, and buffet environments. Featuring a surround-type stainless steel evaporator, it ensures rapid and uniform cooling to maintain beverages at the optimal serving temperature. The unit is designed for energy efficiency and operational reliability, making it a practical choice for establishments requiring consistent, chilled drink service.
