

Double Burner Black Glass Gas Cooktop

This is a double burner gas cooktop with a black glass surface. It features two high-efficiency burners with cast iron supports and a flame failure safety device.

Product Overview

Modern Culinary Performance

This double burner gas cooktop features a sophisticated black glass surface designed to elevate any modern kitchen aesthetic. Engineered for performance and reliability, it includes high-efficiency burners complemented by robust cast iron supports. Safety is prioritized through the integration of a flame failure device, while front-mounted control knobs ensure precise flame management during use.
