

Double Burner Stainless Steel Gas Cooktop

This gas cooktop features two independently controlled burners, each with adjustable flame settings. It is designed for efficient heat distribution and easy cleaning.

Product Overview

Professional Double Burner Cooktop

This double burner gas cooktop is constructed with a durable stainless steel body, designed to withstand the demands of both home and professional kitchen environments. It features robust iron burners and enamel grills for efficient heat distribution and long-lasting performance. With intuitive plastic control knobs, users can easily adjust flame settings for precise cooking control.
