Product Overview

Versatile Commercial Preservation

This double chamber horizontal freezer is engineered for high-efficiency food storage and display in retail environments like supermarkets and convenience stores. Featuring a dual-lid construction, it allows for independent access to each compartment, significantly minimizing temperature loss and energy consumption. The spacious interior, complemented by organized wire basket storage, ensures optimal space utilization for bulk frozen goods.

Design & Construction

Internal Organization

- Wire basket dividers
- Dual independent compartments

Lid Configuration

Double-lid (Hinged)

Exterior Finish

Minimalist White

Performance

Energy Efficiency

Energy-efficient cooling system

Suitable Applications

Commercial, Supermarket, Convenience Store, Bulk Storage
